_____

**How to read data from the console in Javascript?**

Step 1: npm init -y
Step 2: npm install prompt-sync
Step 3: Write a program to read data from the console.

```
JS input.js              {} package.json  ×

ReadOP > {} package.json > {} dependencies > abc prompt-sync
   8        },
   9        "keywords": [],
  10        "author": "",
  11        "license": "ISC",
  12        "dependencies": {
  13          "prompt-sync": "^4.2.0"
  14        }
  15      }
  16
```

```
JS input.js    ×    {} package.json

ReadOP > JS input.js > [∅] b
   1    const input = require('prompt-sync')();
   2
   3    let a = parseInt(input("Enter First Number:"))
   4    let b = parseInt(input("Enter Second Number:"))
   5    console.log(a+b)
```

TERMINAL    PORTS    PROBLEMS    OUTPUT    DEBUG CONSOLE

```
E:\ProStackM\JS\ReadOP>node input
Enter First Number:10
Enter Second Number:20
30
```
